

Bulletin

Dear Competitors,

The Hungarian National Championship was held at Nagykanizsa Airfield and all infrastructure was tested. We are proud to announce that the airfield is ready to host you all for the 14th European Microlight Championship.

To make the stay pleasant to everyone please be advised that cca. 3500 watt power will be available for each team. This is suitable for laptops, chargers, etc but we strongly recommend if you want to cook in the camp choose an other than electric option for it.

Also please make sure that each team brings a national flag that will be used for the Opening and Closing Ceremony.

Wish you all safe journey to Nagykanizsa.

The Organizers
